Subject: Testimonial for you to use from Leslie Franklin

For nearly my entire professional career working with young children, I have contracted a major upper respiratory illness every winter. Once it migrates down into my lungs I know I am doomed. I have gone through weeks and even months of chronic nightly coughing jags that have left me exhausted. Sleeping in a recliner chair, the only position I can assume that doesn't set off the coughing, gets old very fast. I have had physicians prescribe inhalers (claiming I have seasonal asthma), antibiotics, and I have emptied the shelves at the local health food store for every type of homeopathic remedy known to man, and still my chest has rattled and my coughing has rendered me hoarse and insomniac.

Now I have a secret weapon against this bronchial invasion! Last February, in the midst of my annual cough fest, I went to the Nirvana Medical Wellness center. By the third consecutive day of EWOT (riding a stationary bike while breathing oxygen) for 30 minutes and 30 minutes in the Far Infrared Sauna I was completely cured. My husband was astonished (I often keep him awake with my nocturnal hacking) and I was thrilled. I just replicated this excellent result in November, stopping my chest congestion literally in it's tracks in three days! I am a believer!

Thank you Kelly and Roger for bringing this medical miracle to the Santa Ynez Valley!
